Selected Intelligence Services: Expert Witnessing & Whistleblowing

- Report to Hawaii Department of Public Health regarding vaccination laws affecting school children and new mandates. See: Horowitz LG. Vaccine Racket Contaminates Nobel Prizes: School Mandates Evidence Criminally-Negligent Manslaughter. *Medical Veritas International, Inc.* MedicalVeritas.org. November 6, 2018.
- Report to Department of Justice, Federal Bureau of Investigation, c/o FBI Director, Robert Mueller, providing scientific and political intelligence analysis of facts evidencing the mailed anthrax that followed the 9/11 terrorism sourced from the Battelle Memorial Institute under the CIA’s “Project Clearvision.” Horowitz’s analysis and conclusion mailed on December 17, 2001 was subsequently corroborated and published by William Broad in the *New York Times* two weeks later in a front-page feature article.
- Ex parte ‘duty to protect’ notice to U.S. District Court Judge J. Michael Seabright in Civ. No. CV 14 00413 JMS-RLP pursuant to the plaintiff’s counsel, Paul J. Sulla, Jr’s, complicity with Alma C. Ott in America’s most active “White Hate” propaganda cell publishing terroristic threatening articles and videos, cyber-stalking victims, and inciting violence to bring about political, anti-government, racist, and anti-Semitic social changes by incited neo-Nazis to illegal actions causing imminent harm to society. Judge Seabright struck the filing and stayed the case—both suppressive actions aided-and-abetted subsequent proximal civil unrest, violence, and killings in places such as Charlottesville on August 12, 2017 at the “Unite the Right” rally, and the Pittsburgh Synagogue shootings on October 27, 2018.

- Horowitz’s publications prompted the United States General Accounting Office investigation of the “Origin of the AIDS Virus” from the National Cancer Institute’s Special Virus Cancer Program (SVCP) as requested by the Honorable James A. Traficant, Jr., House of Representatives in 2001-02. Traficant advocated for Boyd Ed Graves, an AIDS victim, who erroneously misrepresented Horowitz’s published facts leading the GAO to erroneously conclude the SVCP played no role in the emergence of HIV/AIDS. The inquiry neglected substantial evidence linking the SVCP bioweapons supplier and military contractor, Litton Bionetics, and their ‘special viruses’ supplied for SVCP studies (especially SV40 known to contaminate polio vaccines and cause cancer), recombining with SIVcpz, a second cancer trigger genetically-similar to HIV known to contaminate the earliest hepatitis B vaccines. Horowitz’s related science is widely respected, generally accepted, yet consistently sequestered or disparaged by the ‘corporate media.’
- Report to public health officials by Horowitz resulting in multiple peer-reviewed science publications, including “Murder and cover-up could explain the Florida dental AIDS mystery. (Letters) *British Dental Journal* 1995;178;12:446-447; and “Sexual homicide with HIV in a Florida dental office?” *J Clin Pediatr Dent.* 1994 Fall;19(1):61-4.
- The Deepwater Horizon oil spill, regarded as one of the largest environmental disasters in American history was anticipated (as exclusively evidenced and reported by Horowitz with fellow investigator, Sherri Kane); indicting the Halliburton Co.’s ‘cementation job’ that was probably sabotaged to enable inside-traders to capitalize on the claimed “accident”. The evidence for these charges sourced widespread re-publication along with a TruTV segment hosted by the Honorable Past Governor Jesse Ventura, who required both Horowitz and Kane to appear as whistleblowers in the broadcast covering their report.
- But for a delayed flight, Horowitz and Kane were scheduled to attend the October 1, 2017 shooting at the Route 91 Harvest music festival in Las Vegas where an alleged “lone gunman” named Stephen Paddock killed 58 people and wounded 413, with the ensuing panic bringing the injury total to 869. Being on-site at the crime scene for the ensuing weeks enabled these journalists’ independent investigation, and subsequent publication of the interactive book, *The Las Vegas Deep State Massacre*. Therein, Horowitz and Kane evidenced multiple shooters, and inside traders who capitalized on the false and misleading media coverage, political fallout, and financial windfall from ‘shorting’ MGM Grand stock and investing in the Chertoff Group’s security services and technologies.
- Between August and September 2014, a National Security scandal emerged called “Ebolagate” directly involving Horowitz, who was claimed to have caused growing fears about vaccine safety and the man-made origin of Ebola during the Special Virus Cancer Program. News sources spun Liberian opposition to the World Health Organization’s Ebola operations with critics asserting the international Ebola emergency sourced commercially from drug companies working through the CIA and MI6—proximal to President Obama having called Ebola “a top National Security priority.” The subject *Liberian Observer* article favored Horowitz’s work questioning Anglo-American military involvements in Ebola’s origin and outbreaks. The doctor’s heavily censored publications in this field received international acclaim, including endorsements by numerous Western military and intelligence industry officials. A serious stir was caused in 2008 when President Barack Obama’s minister, Rev. Jeremiah Wright, acknowledged Horowitz and his research during “Wrightgate,” resulting in the President distancing himself from his minister for his stance on AIDS & Ebola viruses being genocidal weapons for depopulation attacking people of color disproportionately.
- 2018-19 reports by Horowitz on the Executive Director of the Supreme Court of Hawaii’s Office of Disciplinary Council (“ODC”), Bradley R. Tamm, was compiled for legislative and public scrutiny by reason of witnessed ethics violations by Tamm, conflicting interests, and aiding-and-abetting fellow corrupt lawyers engaged in drug trafficking, real estate money laundering, and bribery among assorted alleged racketeering activities. Evidence filed with several state and federal agencies by Horowitz widens a federal public corruption probe that netted Honolulu law enforcers and justice officials. Horowitz’s study and official complaints to state and federal agencies corroborated the 2016 judicial corruption study published by the Brennan Center for Justice at New York University School of Law, that showed Hawaii as the only state in America operating covertly or “above the law.” The indictments show justice officials in Hawaii administer a system that disregards the legislated Code of Ethics, and the State’s “Sunshine Act,” to insulate judges and their appointees, including Bradley Tamm, from political, executive, and public scrutiny. Tamm is evidenced having committed evidence tampering and witness tampering to obstruct justice in proceedings advanced by his subordinate ODC investigators.

- A report on the University of Hawaii’s Psychiatry Department’s official review of King Kalakahua’s death compiled by professors John F. McDermott and Anthony P. S. Guerrero in their “Historical Clinicopathological Conference” report was reviewed and condemned by Horowitz, resulting in widespread interest in the King’s apparent demise from kidney and liver damage caused by prescribed chloroform and opium while consuming cocaine, alcohol, marijuana, and caffeine while under the care of the U.S. Navy Surgeon General of the Pacific Fleet, Dr. George W. Woods—facts recklessly neglected by the UH professors.
- Report of Nov. 20, 2017 to Honorable President Trump, Attorney General Sessions, U.S. Secretary Tom Price, and Deputy Secretary of Health and Human Services Eric D. Hargan, pursuant to the “Opioid Emergency”, U.S. Department of Justice, Criminal Division, Washington, DC 20530-0001; Reference Number: DA300631151. Request to reconsider the Criminal Division’s correspondence denying relief for: (1) “[in]sufficient details or evidence to warrant action;” and (2) “concerns . . . already . . . submitted to proper authorities,” including the FBI. Given that two FBI investigators independently filed reports seeking further investigation(s) and needed resources to indict organized criminals in Hawaii that were aided-and-abetted by willfully blind courts; only to have their recommendations for further actions quashed by superiors working under Robert Mueller, evidences public corruption giving an “impression of impropriety” in law enforcement damaging the public’s health and safety by concealing drug trafficking from Hawaii to the mainland U.S. by a criminal syndicate involving attorney Paul J. Sulla, Jr. and Office of Disciplinary Counsel Director, Bradley Tamm, et. al.
- Reports beginning in 2015 through 2019 by Horowitz and Kane unearthed irrefutable evidence of military connections to the Thirty Meter Telescope project falsely claimed to have “no military connections whatsoever.” Their reports were subsequently filed by litigants favoring the termination of the TMT project for fraud and misrepresentation during public hearings. These reports are said by many “Protectors” to have played a significant role in developing legal and social opposition to the ‘dual purpose’ quasi-military/astronomy project.
